

PROJECT REPORT

(New Delivery Car Purchase)

Empowering Vulnerable Youth to become Confident, Resilient, and Skilled Farmer Entrepreneurs through Organic Farming

The Learning Farm, Cianjur – West Java

2024

Profile

The Learning Farm was established in 2005 to address the lack of skills, opportunities, and hope among vulnerable youth. The poor and vulnerable youth of Indonesia have been deeply affected by the country's economic crises and lack both education and economic opportunities.

Today the program takes in 40 rural youth per batch to better prepare them for the challenges of becoming successful farmer entrepreneurs.

We run a five-month residential program for young men and women from throughout the Indonesian archipelago, and have graduated over 1,454 successful graduates to date.

Project Objective

This program is designed to empower vulnerable and at-risk youth in Indonesia through an organic farming residential course. The young men and women are 17 to 24 years of age, and come from diverse backgrounds. Some are urban or street youth, others are rural poor. They come from all over the Indonesian archipelago, from Aceh to Papua.

The majority of these young people come to The Learning Farm through a referral system through other organizations involved with youth. Some are illiterate whilst others have graduated from high school. Many are without the security of a family unit whilst others come from single parent families or impoverished households. Some have experience with drug addiction and have spent time in prison whilst others have never even experienced being away from their villages.

Project Outcomes

- Reduce the number of vulnerable youths in Indonesia
- Minimize environmental degradation
- Improve an individual's employability skills
- Reduce rural-urban migration
- Ensure food security of families, communities and the nation

Our Vision

Empowering vulnerable youth to become confident, resilient and skilled farmer entrepreneurs.

Our Mission

- Establishing a safe, nurturing learning environment
- Instilling essential life skills and core values through the medium of organic farming
- Developing environmental responsibility
- Creating a sustainable network of alumni actively engaged with the community
- Ensuring continuous staff developments
- Maintaining accountability to all stakeholders

Project Summary / Key Deliverables

This project develops the capacity of vulnerable Indonesian youth who are living on the streets, are school dropouts, reside in areas of poverty, have no access to jobs, or are victims of disaster. Through an intensive 5-month program built around organic farming, each batch consists of 40 youth who are provided with the knowledge and skills to enable them to achieve economic self-sufficiency. This program also includes training in basic life skills such as leadership, marketing, English language, computer literacy, etc.

Our Theory of Change is **EMPOWERING VULNERABLE YOUTH TO BECOME CONFIDENT, RESILIENT AND SKILLED FARMERS ENTREPRENEURS.**

CONFIDENCE is sorely lacking in both our vulnerable rural and urban youth. We first work on the hearts to build that belief in a better future in themselves and their country.

RESILIENCE is emphasized. This could be financial resilience, climate resilience and personal resilience. Today it is more important than ever. That is where we work with their heads, building them up with the knowledge needed to be successful. We also work with our multiple volunteers for this.

SKILLS are where they will learn proper first-rate organic farming, respect for the land and nature, as well as for themselves. This has always been the bedrock of our work. This is the hands part of the curriculum.

And **ENTREPRENEURSHIP** is emphasized, for it is no longer enough for farmers to blindly follow how their parents and grandparents cultivated the land. It is essential to have better tools for determining value-add crops, accessing markets, using technology, preparing business plans if they are to be successful.

Skills We Impart

ORGANIC FARMING

Our curriculum follows the national curriculum for organic farming, but goes beyond to teach life skills and values to our youth. The main organic farming units are: Ecosystems, Waste Management, Composting, Creating Effective Microorganisms, Planting Seeds, Using Organic Pesticides, Land Care and Processing, Livestock Management, Integrated Farming etc.

LIFE SKILLS

Most of this learning is provided by partners or volunteers who kindly share their knowledge on everything from Basic Computer, English, Entrepreneurship, Marketing, Communication, Social Development, Customer Service, Gender Equality, Financial Management, etc

ATTITUDE CHANGE

Through the teaching of the six Core Values of Responsibility, Discipline, Teamwork, Caring, Integrity and Initiative we seek to change the attitudes of our students to help them become more resilient, self-aware and responsible members of society.

New Delivery Car Purchase Report

The Learning Farm sells all the vegetables/eggs/rice and mushrooms grown by our students at the farm. This helps to defer up to 25% of our operating costs. However, with only one delivery van to cover all our customers in Jakarta, and with traffic congestion, this is becoming increasingly challenging. In addition, to maintain the quality of vegetables delivered we need a new van.

At first, we planned to buy a Mitsubishi L300 plus Body Box Body. But with various considerations, we finally chose to buy the DAIHATSU GRAN MAX MB 1.5 D PS MC. This vehicle will simplify the process of sending our vegetable products to our customers in Jakarta. With this, we can also increase vegetable sales, making it easier for us to help empower vulnerable youth throughout Indonesia.
